Re: City of West Union, Iowa

Dear Mr. Simon,

This letter is to inform you that the City of West Union, Iowa, a recent applicant to the DOE's "Geothermal Technologies Program: Ground Source Heat Pumps" grant opportunity, is also applying for I-Jobs funding from the State of Iowa to complete the project. Funds from your program, if awarded, will go to the installation of a district-wide geothermal heating and cooling system. The focus of the I-Jobs application is future flood mitigation and, if received, will be utilized in the water retentive aspects of the streetscape project: permeable pavers, bioswales and raingardens, etc. This letter is to satisfy the I-Jobs requirement that the City of West Union provide notification of the city's intent to apply for I-JOBS funding to avoid potential duplication of benefits issues.

Sincerely,

A handwritten signature in black ink, appearing to read "Martin Games", with a long, sweeping horizontal line extending to the right.

Martin Games
City Administrator
City of West Union
